

OBDLink MX Bluetooth

Android Quick Start Guide

Android 

1 Download & install OBDLink app

Scan the QR code or visit the URL from your Android device to download the OBDLink app:

obdlink.mx/app

2 Plug MX Bluetooth into the diagnostic link connector (DLC)

The DLC is usually found on the driver's side, under the dash.

– Can't find your DLC? Visit dlc-locator.com

3 Turn ignition to Key On, Engine Off position

'POWER' LED will turn ON, and the 'BT' LED will start flashing slowly.

– LEDs are off? Check vehicle for blown fuses.

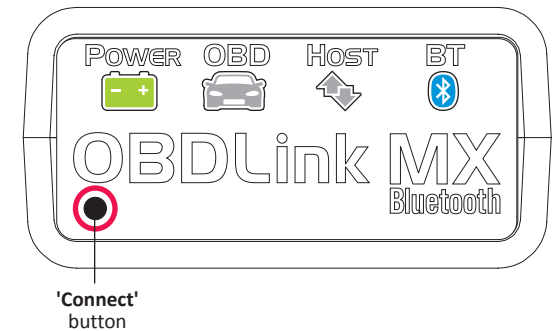

4 Open 'Settings' app, and enable 'Bluetooth'

5 Tap 'Bluetooth - Pair with a device'

6 Press the 'Connect' button on MX

The 'BT' LED will switch to a *fast* blink.

Attention!

You must complete steps 7, 8, and 9 within **2 minutes**. If you need more time, press the button again.

7 Wait for OBDLink MX to appear on the 'Available devices' list

Tap 'Scan' if OBDLink MX does not show in Available devices.

8 Tap 'OBDLink MX' to pair the device

[instructions continue on reverse]

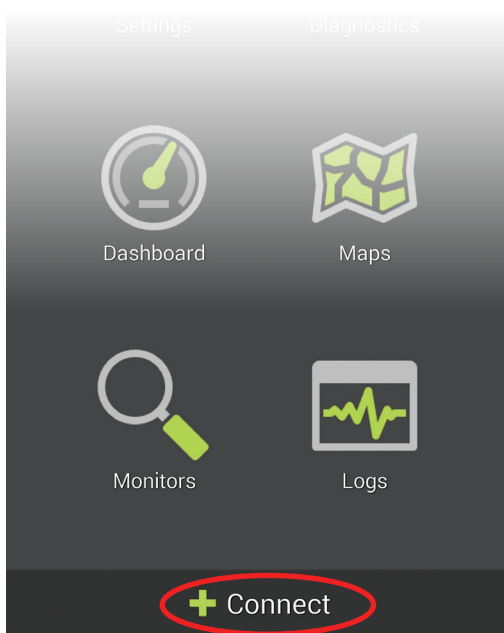

9 Tap 'OK' in the 'Bluetooth pairing request' dialog

MX will now appear as **'Paired'**:

10 Launch the OBDLink app, and tap 'Connect'

11 Choose 'Bluetooth'

12 Choose 'OBDLink MX'

Once the app establishes a connection with MX, the **'BT'** LED will turn on solid. Tap **'Diagnostics'** to start a scan.

– Need help? Go to obdlink.com/support or scan the QR code

– For advanced configurations, go to obdlink.com/setup or scan the QR code
